- **NanoSolutions**
 - Spoken with scientists about data collection (including omics data)
 - What would you like to have in the nanomaterial database?

 - eNanoMapper D4.4 (due soon) will talk about omics data

- Egon will check if D4.4 draft can be shared
 - Raw and processed data (raw data set aside for now)
 - The agreement with eNanoMapper: was signed by eNM partners

Database Survey task

- [CaLIBRAte](#) interested in teaming up (Martine Bakker, RIVM, is the contact)
- What are our next steps and the timeline?

Linked Data task

- Egon: in eNanoMapper working on link set support (as part of the RDF export work)
 - Can export link sets via a SPARQL query
- “Integration among Databases and Data Sets to Support Productive Nanotechnology: Challenges and Recommendations” paper almost done
- No actual progressed in [factual link sets](#)

Open Data License/Waiver

I got a question from one of the NSC project, what license to use for data that the project wants to release as Open Data. Is there a NSC standard for this? If not, can the WG4 develop such a standard?

- Who wants to help create a guideline? Egon
- [Sabina Leonelli](#), Exeter
 - maybe an idea for the Basel meeting?

Coordination among EU-US/WG4/NANoREG efforts

- many parallel efforts
- expectations may differ from what is being done
- direction/aim of the Nanoinformatics Roadmap: informatics vs. modelling, coordinate with NanoEHS CoRs efforts (*note the next TC on the roadmap organized in the last week of July*)

Next virtual meeting: Aug 9th
