

How to develop the work of WGs - *Only fix what is broken, and not everything is!*

- 9 Current WGs:

- WG1 Materials
- WG2 Hazard
- WG3 Exposure
- WG4 Database
- WG5 Risk
- WG6 Modelling
- WG7 Dissemination
- WG8 Systems biology
- WG9 Safe by design and industrial innovation

Similar objectives:

- Scientific progress
- Project collaboration & Synergy
- International linking
- Interaction with stakeholders
- Joint Workshops
- Etc etc

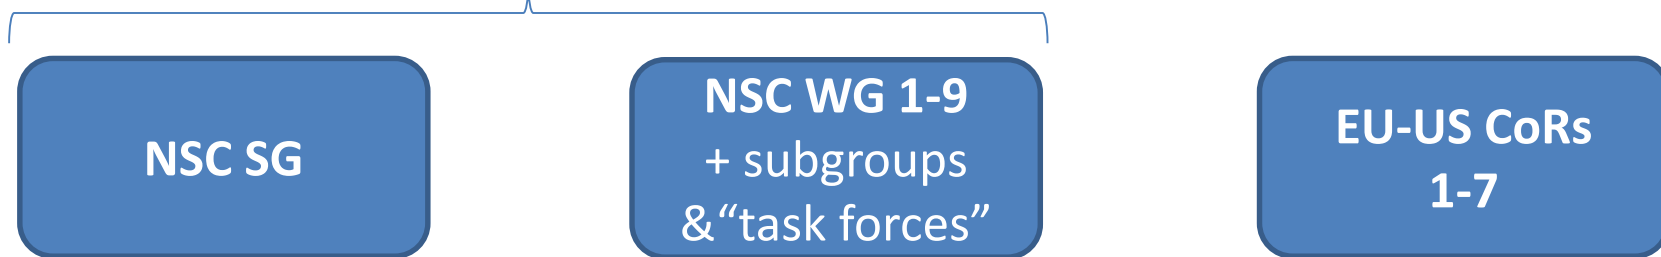

What is NOT working? The WG have no meeting forum!

- NSC objectives are too many and too wide for one assembly
 - Separate Science delivery from NSC Strategy and Management
 - Double work between NSC WG and US-EU CoRs => dilutes efforts
- Delivery of different objectives require different people and groupings.*

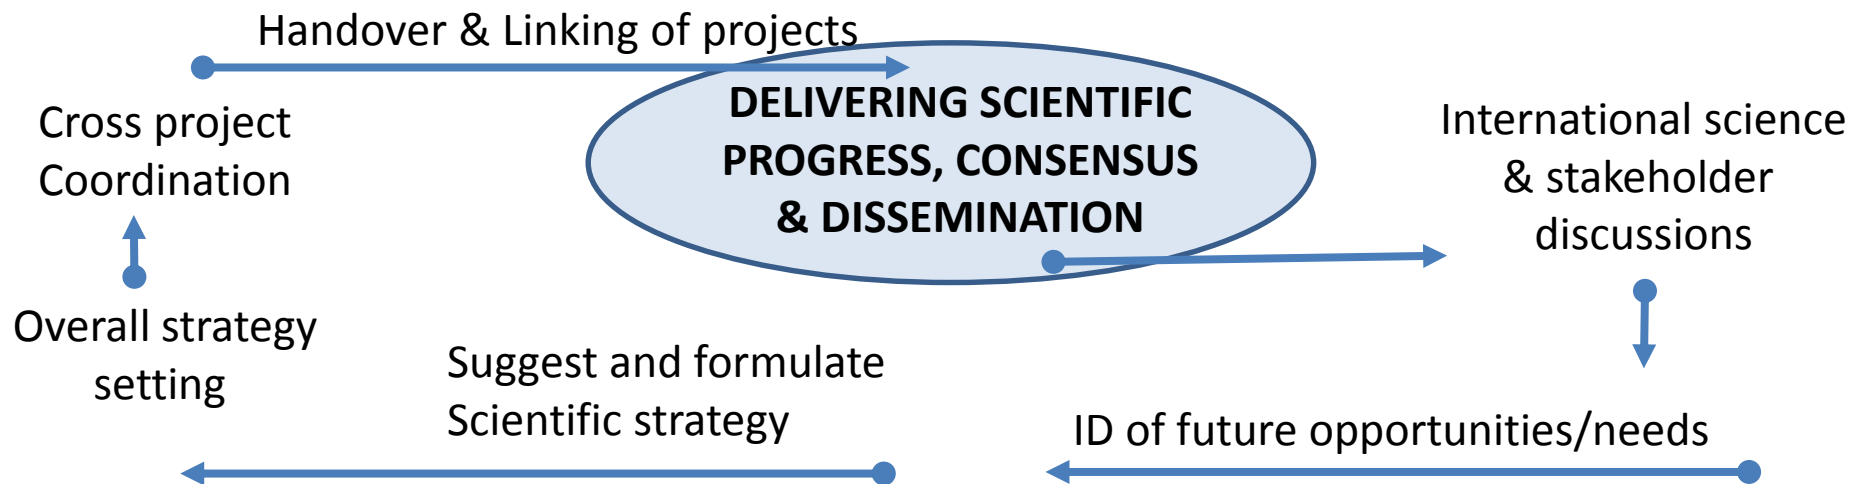

Proposal for new structure & roles

- **WG based science meetings and collaboration of researchers across EU projects**
 - **Sharing of project methods, techniques, results**
- Task force on data resource sustainability
 - Sustainably secure project outcomes
- Task force on stakeholder involvement
 - International exchange of knowledge and resources with various stakeholders
 - Setting future research priorities
- NSC SG with current EU funded project coordinators + **NSC WG leaders** + Georgios & Nicolas
 - Assure synergy and collaboration
 - Planning of collaborative actions (workshops, training events, conferences, etc.)

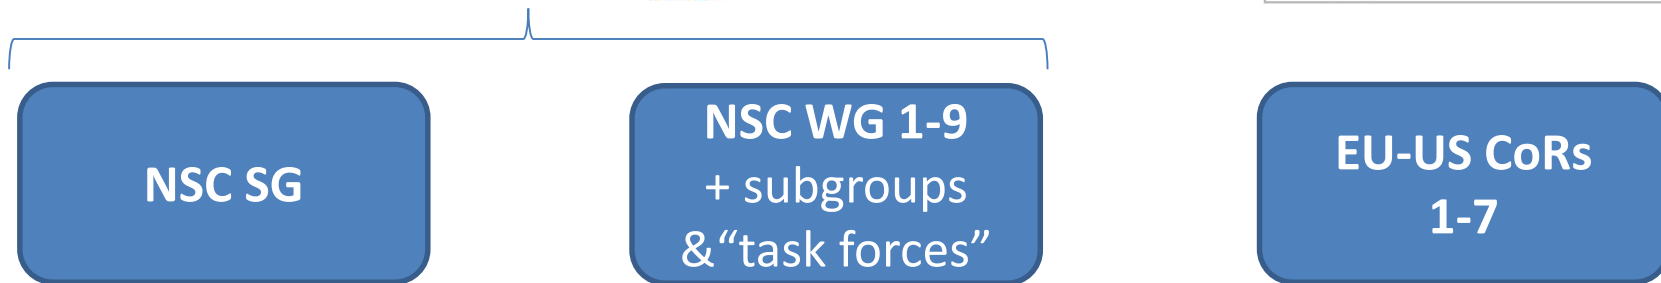

Proposal for new structure & roles

Objective mapping:

Proposal for new structure & roles

Structural, method & focus changes needed:

Planned 3mth meetings (TC/VC)

Set yearly planning cycle (calls etc)

Handover ongoing and starting projects
(share SOPs, Data, identify collaborations)

Strategy development & setting

Planned SCIENTIFIC WSs
(face to face – multiday)

Lead through WG & EU Projects

Focus on TOPICAL QUESTIONS

Reduce WG numbers
& align with CoRs

Annual meeting

Knowledge sharing

New collaborations

ID Future opportunities (needs)

Who involved / attends:

NSC Coordinator (Facilitator)

NSC WG leaders

NMP Project Coordinators

EC Project officers (EC link)

Data & Stakeholder

Tasks forces

NSC WG Leaders

NMP Project scientist

EU Stakeholders

EU & US Researchers

EU & US Stakeholders
