

Development of NSC WG work

Kai Savolainen
NSC Coordinator
Work Environment, FIOH

NSC working Groups & CoR's

- The development of NSC WG's has been discussed for a long time because most of the WG's have not been very active; shortage of commitment has been due to lack of human resources and designated funding
- EU Com - US NNCO CoR collaboration has led to the question whether the WG topics should be aligned with the CoR topics to avoid overlapping work; this has gained some support among the NSC
- In the following, the topics of NSC WG's and CoR's have been compared

CoRs and WGs

CoRs	WGs
Characterization	WG1 Materials
Databases & Computational Modeling for NanoEHS	WG4 Database WG6 Modelling WG8 Systems biology
Exposure through Product Life	WG3 Exposure
EcoToxicity	WG2b Eco-Hazard
Human Toxicity	WG2a Hazard
Risk Assessment	WG5 Risk
Risk Management & Control	WG7 Dissemination WG9 Safe by design and industrial innovation
